

There is a significant reason why Over 2.8 million New Jerseyans have already signed up for the Do Not Call Program (which represents approximately two out of every three residential phone lines in the state). My understanding is the program has been a resounding success; many residents report almost a 100 percent drop in unwanted sales calls. I personally have experienced a 100% drop in these types of calls as well. If a program is such a success why would a group be lobbying to overturn it? Exactly that reason because the program IS an overwhelming success --- telemarketers are coordinating attacks on the law prohibiting UNWANTED telemarketing sales calls.

I implore you to PLEASE SUPPORT the NJs and other states "Do No Call" laws. NJ residents were tired of being bombarded with UNWANTED telemarketing calls at all times of the day & night! The fact that 2.8 million of us immediately signed up for the program should say volumes!

Businesses don't have the right to invade my personal privacy with annoying telemarketing calls - REGARDLESS of whether or not we've had a business relationship in the past 18 months. Once my business concludes with an organization it should end there! If a business has an overwhelming desire to tell me about a "Good Deal", "Great Buy", or "Special Offer" then send me something in the mail -- it supports our U.S. Postal Service AND gives me the discretion to open or throw away the unsolicited mail.

I am adamantly opposed to any weakening of NJs "Do Not Call" program and I would request the FCC respect the wishes of New Jersey 2.8 citizens who signed up for the program and keep NJs "Do Not Call" laws in tact.
